PROFILE

Computer Science undergraduate with a strong interest in Artificial Intelligence, Machine Learning, and Data Analytics. Skilled in Python, SQL, and web technologies, with hands-on experience building projects such as StartPunch, ForReal, Flexy, and Zobnext. Passionate about leveraging technology to solve real-world problems, explore innovative ideas, and continuously expand technical expertise through practical development and learning.

PROJECTS

- StartPunch

 - AI-powered startup idea analysis platform that helps entrepreneurs evaluate startup ideas and receive insights on growth potential, opportunities, and business viability. Designed to support informed decision-making during the early stages of startup development.
- ForReal

 - Community-driven discussion platform focused on meaningful conversations and knowledge sharing. Users can create discussion rooms, participate in topic-based debates, exchange perspectives, and engage in interactive discussions within online communities
- Flexy

 - Online marketplace platform enabling users to buy, sell, and bid on products through a streamlined interface. Developed features including product listings, bidding workflows, user authentication, and profile management to improve user experience and marketplace interactions.
- Zobnext

 - Part-time job marketplace connecting workers with individuals and businesses seeking temporary assistance. Developed job posting, application management, and worker discovery functionalities to simplify hiring and job searching processes.
